Our neighbors have been particularly shocked at the taking the left stocking off last." restoration of the Archdukes, to which France offered no opposition at Villa-Franca. They would have preferred a pure and simple annexation of Parma, Modena, pathies inspired by Piedmont and her chivalrous King. flight. Piedmont, it must be owned, has made for herself a separate and glorious position in Europe. She, when all despaired of Italy, still hoped and resolutely raised grand and disinterested up to the present, and because t has been nobly represented, we must not make her abandon it. Piedmont has been, and still is, the sword of Italy, which she ought to be sufficiently strong to defend, but not to absorb. It concerns her glory, it concorns the safety of Italy, that the mission of national should not change its nature.

tacts which recent events have not been able to change. hould meet with serious attention by the arbitration of steads, Toy Bureaus, &c. Enrope. France has declared, and still declares, that March 2d, the preliminaries of Villa-Franca were conceived and aggred in the interest of the peoples, and that in that specified they must be interpreted. France declared, and will declares, that she will neither forcibly interfere herall nor permit any one else to interfere in the Duchies. At the same time we would suggest that the votes of the approximationists of which so much has been said, have not perhaps so much value as is attributed to them.

Florence, Parma and Modena will submit with diffi ealty, in spite of what is said to the contrary, to become nothing more than the chief towns of a kingdom of which Turin would be the capital; and the Princes who are expelled to day would be, perhaps, regretted at some future time more or less near. Who can say whether the exiles of to-day would not on the morrow become the representatives of local Independence?

But this is not all. It has not been considered that an additional province given to Piedmont destroys the equilibrium so happily established between her and the Kingdom of the Two Sicilies. What has already taken place in 1848, however, ought not to be forgotten. Is it not possible that the jealous rivalry which caused the this that would act on the Liver, Stomach and Bowels, with Neapolitan troops to retrace their steps may again burst | the forth? Such an event would be serious, for it would on a second occasion bring with it a complete rupture between the two most powerful States of the Peninsula, nationality would run the chance of being compromised. These considerations, doubtless must have had great weight at Villa-Franca in the determinations of the

They are weighty enough, in our opinion, to occupy all serious minds, or all the real friends of Italy. Wilderness-Trials and Suffering of the Party. Mr. Haddock, who ascended in a balloon with La Mountain and landed in the wilderness in Canada, gives an interesting account of the adventure and their subsequent trials and sufferings. They were up all night, but towards daylight took a hitch to the top of a pine tree. The next morning they concluded they were in Canada, and followed the course of a creek till they came to a lumbering shanty, in crossing to which one of them got soused in the creek. My boots both leaked, and our mighty wrestlings in the canon had torn the skin from my ankles and hands. La Mountain's hat was gone the first day out; he had thrown away his woolen drawers and stockings the first day of our tramping, as they dragged him down by the weight of the water they absorbed. which speaks glowingly of the superior merits of his hair tonic. Such evidences must have its effect, when coming from a reliable source. If certificates are guarantees of truth, the Dr. needs no enconium, nor useless puffery from the BATH, MAINE, Jan. 20, 1856. Hats. New York Styles Cassimere, Silk and Soft Gentlemen: Having my attention called a few months

which had become quite gray, probably one-third white my whiskers were of same character. Some three months since I procured a bottle of your hair restorative, and used it. I soon found that it was proving what I had wished .-I used it about twice a week. I have since procured another bottle, of which I have used some. I can now certify to the world that the gray or white hair has totally disappeared, both on my head and face, and my hair has resumed its its natural color, and I believe more soft and glossy than it has been before for twenty-five years. I am now sixty years old; my good wife at the age of fifty-two, has used it with same effect.

The above notice I deem due to you for your valuable discovery. I am assured that whoever will right y use, as per directions, will not have occasion to contradict my statements. I am a citizen of this city and a resident here for the last fifteen years; and am known to nearly every one here and adjoining towns. Any use you may make of the above, with my name attached, is at your service, as I wish to preserve the beauties of nature in others as well as my-A. C. RAYMOND. self. I was induced to make a trial of your preparation, and found it to answer as the very thing needed. My hair is now thick and glossy, and no words can express my obligations to you in giving to the FINLEY JOHNSON. afflicted such a treasure. The undersigned, Rev. J. K. Professor Wood-Dear Sir: Having made a trial of your Hair restorative, it gives me pleasure to say, that its effect has been excellent in removing inflamation, dandruff and a constant tendency to itching with which I have been trouled from my childhood; and has also restored my hair, which was becoming grav, to its original color. I have used no
